

# Thank you for downloading this freebie!

**If you enjoy this freebie, be sure to check Brandminute Mockups Full Pack:**

<http://crtv.mk/i0ddH>

Here's what you'll get with the full pack:

- 150+ Items divided in 8 PSD files + JPG previews
- 12 Pre-made PSD scenes + JPG previews
- Editable design templates inside smart objects
- 20 High-resolution JPG textures

Before starting, you need to delete the top blank layer on each PSD file. FYI adding a solid color layer on top of the other layers helps to reduce the overall file size.

If you want to edit the design templates included with this pack, you should download and install these fonts on your system:

Montserrat: <https://www.google.com/fonts#UsePlace:use/Collection:Montserrat>

Source Sans Pro: <https://www.google.com/fonts#UsePlace:use/Collection:Source+Sans+Pro>

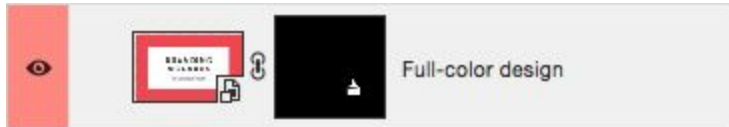

Playfair Display: <https://www.google.com/fonts#UsePlace:use/Collection:Playfair+Display>

SensaBrush Demo: <http://www.fontfabric.com/sensa/>

## How to edit the smart objects

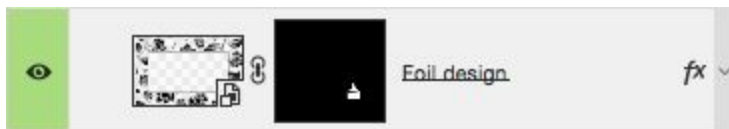

1. Open the .psd file inside Photoshop (minimum version required: CS4).
2. Double-click on the smart layer thumbnail to open the smart object container (.psb file)
3. Inside the .psb file you can find a placeholder template used for demonstration. You can edit the template or drag&drop your own design in place.
4. After finishing editing, hit Save (Cmd/Ctrl+S). The changes will apply in the main PSD file.

## What you can do via the smart layers

### 1. Full-color design (red label)

Here you can place the design that resembles the four color printing process.

### 2. Foil design (green label)

Here you can place the design that resembles the metallic foil stamping effect.

### 3. Change foil (yellow label)

Here you can choose to display one of these foil textures: gold, rose gold or silver.
